COOKIE CATS A/B TEST

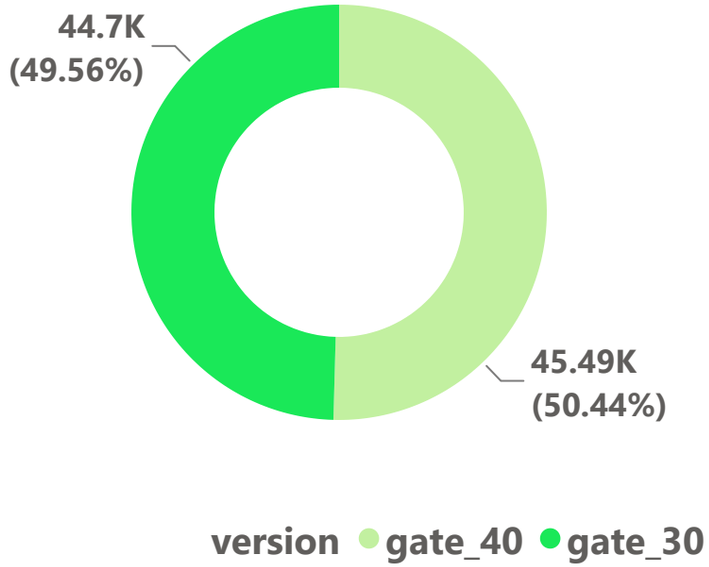

DOES MOVING THE GATE FROM LEVEL 30 TO 40 AFFECT PLAYER RETENTION

0.00	0.01	90K
Retention 1 Gap	Retention 7 Gap	Total Players

Day 1 VS Day 7 Retention: Gate 30 VS Gate 40

Player Split by version

STATISICAL SIGNIFICANCE TEST RESULT

Retention_1 (Day 1): z = 1.784, p = 0.074 → Not statistically significant

Retention_7 (Day 7): z = 3.164, p = 0.0016 → Statistically significant

Recommendation

Do not move the gate from level 30 to level 40.
Day-1 retention shows no significant difference, but gate_30 shows significantly higher Day-7 retention.
Moving the gate risks losing long-term engaged players for no measurable short-term gain.
